JavaScript Tutorial course
Responsive Web Design
Front End Libraries
jQuery Tutorial

Ekaterina Paulovich

Frontend Developer
Belarus

Общие сведения

A few years ago I started with self-education and dedicated all my free time to studying programming and solving tasks from different sources. I graduated requalification courses on the base of second education and got qualification 'programmer-web-design'. Attended The Rolling Scopes School, freeCodeCamp, learn.javascript.ru courses and more.

Now I am mostly interested in React and its' ecosystem but also open to opportunities to study something new.
